

TUFTEX

BALLOONS

Naturally Biodegradable

TUFTEX latex balloons are made from natural rubber latex, not plastic. Latex is harvested from the Hevea brasiliensis (rubber) tree and will naturally biodegrade over time.

Sourcing Matters

Our latex is sourced from responsibly managed plantations. TUFTEX suppliers adhere to rigorous responsible-sourcing and sustainability standards and hold leading third-party certifications, including:

- FSC® Certification
- Carbon Neutral Status
- Certified Carbon Footprint
- EcoVadis Sustainability Rating
- GPSNR Certification

These measures ensure:

- Traceability across the supply chain
- Ethical labor practices
- Reduced environmental impact
- Continuous sustainability improvement

Smart Balloon Practices

We advocate responsible balloon use:

- Always secure balloons to a weight
- Do not release balloons into the air
- Recycle or dispose of balloons and packaging responsibly

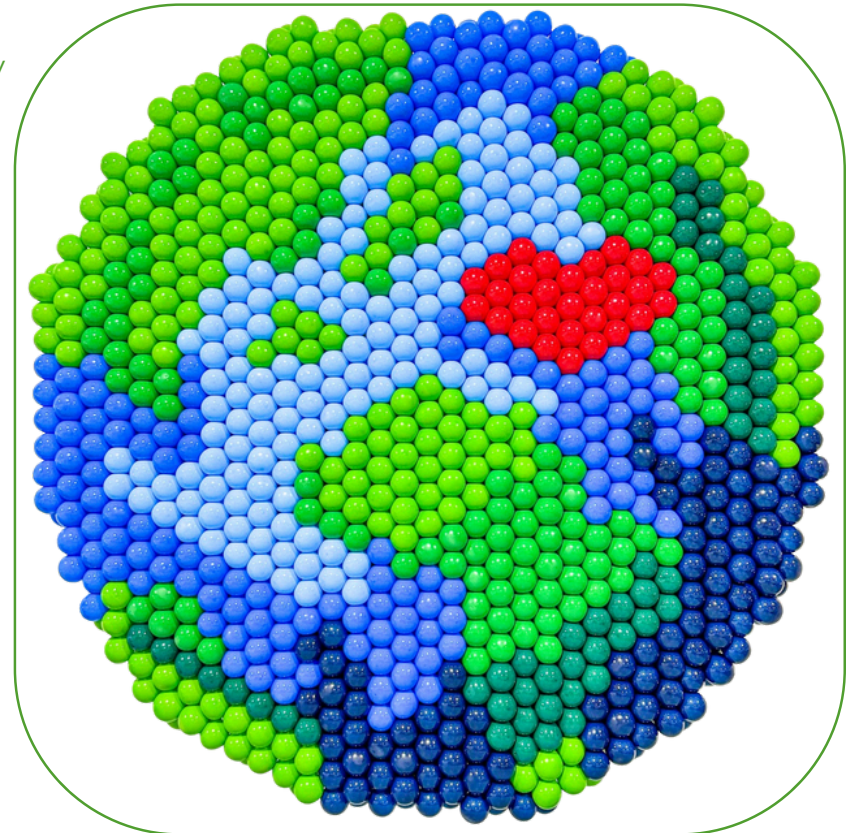

Committed to a Softer Environmental Footprint

TUFTEX Balloons is a proud member of:

Member of
European Balloon & Party Council

When enjoyed and disposed of properly, latex balloons can help celebrate life's moments while minimizing environmental impact
